

February 24-25, 2010 • Wyndham Hotel, San Jose, CA • ethernetsummit.com

Dear Paper Presenter:

This email confirms that you will participate in a paper presentation session at the Ethernet Technology Summit to be held at the Wyndham Hotel in San Jose, California on February 24-25, 2010.

Please remember that the Ethernet Technology Summit is a technical event. You can use your company's products as examples, but avoid sales pitches or detailed product descriptions. Keep your basic talk general and emphasize technical issues and questions.

We include in this email:

- Instructions to help you plan your talk.
- Sample page to use as a guide for submitting brief statement to be published in the Proceedings.
- Summit Overview
- Correspondence
- Request for Biographical information
- Transfer of Copyright form which you should fill out and return to Ellen (ellen@ethernetsummit.com; subject line: Ethernet Technology Summit) with your PowerPoint presentation. If your presentation will not be ready in time for the Summit Proceedings, please submit a one-page statement (see example) along with these forms. You should then submit your slides to webmaster@ethernetsummit.com after the Summit is over.

Due date for material to be included in the Proceedings is * January 22, 2010 *****

Note that you must register for the conference (no exceptions) on the Web at www.ethernetsummit.com. Use the speaker registration to get the reduced speaker fee. You will have to pay the full fee if you do not pre-register.

Sincerely yours,

Lance A. Leventhal
Program Chairperson, Ethernet Technology Summit
lance@ethernetsummit.com

KEY HINTS FOR SPEAKERS

- Don't put too much on your slides. 30 words should be the maximum. And please no tiny figures or charts no one can read.
- Limit your lists to 3-5 points (shown to be the most people can comprehend at one time). If you have more, drop the less important ones or combine points into groups.
- Conclude your talk by indicating the 1 or 2 major ideas you think the audience should remember.
- Keep your hands out of your pockets!

PRESENTER INSTRUCTIONS

INTRODUCTION

Paper sessions will run 1 to 1 ½ hours. Each presenter will have about 15 minutes for his or her talk, including questions and answers. The rest of the time will be devoted to audience questions and discussion.

PREPARING YOUR TALK

Organization

The time limit restricts how many technical points you can expect your audience to absorb. A good guideline is to have no more than 8. This restriction will help focus the audience's attention on the most significant information.

Visual Aids

You should plan a slide for each key point. Each slide should have at most five major supporting concepts. When using PowerPoint, try not to overdo things. Small print, tiny figures, and odd color combinations can make your slides completely unreadable. We suggest you limit your text to 30 words per slide, and put figures and graphs on separate slides rather than crowding them in with the text.

You should have an initial slide with the title of your talk and your contact information (name, job title, affiliation, address, telephone, and e-mail). You should also have a final slide covering sources of further information, such as books, magazines, conferences, technical societies, standards groups, and Web sites. A few good sources (say, 3 to 5) will do the job.

Please provide a copy of your PowerPoint presentation for the Proceedings and for posting on the Website after the event (send a copy to webmaster@ethernetsummit.com).

Timing

You can expect to speak about six sentences per slide, which normally runs 1 to 1 1/2 minutes. If you have 10 slides, your basic presentation will last 12 minutes. This leaves a little time for an introduction and summary.

Do not run overtime. The chairperson will warn you when you are close to the limit.

Improving Your Mechanics

Jot down a few words to start your train of thought at each point. Be sure to add to the slides; don't just repeat what the audience can already see.

Try to make your talk interesting. Vary your approach, speed, style, and tone. Humor can help if it isn't in bad taste or insulting. Be sure to make eye contact with your audience (and not just with one person). Do not stare at your notes, the screen, or the floor. And keep your hands out of your pockets!!! Also be careful not to stand in front of the screen, talk into the screen or the floor, or pace back and forth.

Try to say something original, surprising, or controversial. Raise significant issues.

Answering Questions

Before answering a question, be sure that everyone knows what it is. Repeat it if necessary. Note that people in back of the questioner usually cannot hear a thing. Then answer the question concisely and directly. Restrict your answer to about two minutes. If someone wants more detail, ask him or her to meet with you afterward. Do not argue with questioners or other panelists. Let the chairperson manage the discussion.

POWERPOINT TEMPLATES

Ethernet Technology Summit PowerPoint templates will soon be available on the Website **For Speakers** page:

http://www.ethernetsummit.com/English/For_Speakers/For_Speakers.html

We request that you use these templates for your presentation at the Summit.

PROCEEDINGS MATERIALS

DUE DATE: for slides, one-page statements, and other material to go in the on-line Proceedings
*** JANUARY 22, 2010 ***

The Proceedings will be posted on the Website; it will not be distributed. Please send all materials **in .doc (text) OR .ppt (slides) format** to:

ellen@ethernetsummit.com

THE ROLE OF ETHERNET IN NEANDERTHAL APPLICATIONS

Rebecca M. Sharp and Ernest R. Worthing
Jurassic Computer Enterprises
275 Anthill St.
Zenith, IN 55555 USA
(555) 555-5555/5560 fax
rsharp@jurassic.com

Ethernet has become the fundamental conundrum for modern communications technology in next-generation network infrastructures. New forms such as 10 GbE, 40 GbE, 100 GbE, and Carrier Ethernet are all essential in developing today's state-of-the-art consolidated data centers as well as telecommunications centers and networks. Industrial, home, and wireless networks are also turning to Ethernet as their base protocol. Issues such as quality-of-service, management, latency, security, and interfaces with legacy networks all need to be resolved. Tools such as analyzers, bit-rate error generators, emulators, and simulators must provide the required synergy for categorizing convergent Ethernet paradigms and realizing high-performance ecosystems.

Rebecca M. Sharp is an Ethernet Product Manager at Jurassic Computer Enterprises. She was formerly the Chief Winged Monkey at the Wicked Witch's Castle. She received her B.A. degree in embezzlement from the Western New Guinea Correspondence School of Telecom Platform Development. Ernest R. Worthing is a Staff Ethernet Development Engineer at Jurassic Computer Enterprises. He was previously an assistant saber-toothed tiger at the La Brea Tar Pits.

Copies of the presentation are available at www.jurassic.com/garbage/slides or by e-mailing rsharp@jurassic.com.

Jurassic Computer Enterprises specializes in providing Ethernet solutions for the pornography, archaeology, and UFO industries. In business since 1357, it focuses on methods for avoiding legal intercept and financial disclosure. It expects to offer its first actual products in 2050 or later.

OVERVIEW of the SUMMIT

The Ethernet Technology Summit will be held on February 24 - 25, 2010 at the Wyndham Hotel in San Jose, California. The Web site is www.ethernetsummit.com.

GENERAL SCHEDULE

Tuesday, February 24 – Tutorials, General Sessions, Keynotes, Exhibits, Reception, and Chat with the Experts

Wednesday, February 25 – Tutorials, General Sessions, Keynote, and Exhibits

CORRESPONDENCE

Direct all correspondence and inquiries about the conference to:

CONFERENCE MANAGER:

Chip Stockton
Conference Concepts
12463 Rancho Bernardo Rd #373
San Diego CA 92128
E-mail - chip@ethernetsummit.com
Voice - (858) 673-1372
Fax - (858) 673-1375

PROGRAM CHAIRPERSON:

Dr. Lance A. Leventhal
Emulative Systems Co
PO Box 1258
Rancho Santa Fe, CA 92067
E-mail - lance@ethernetsummit.com
Phone - (858) 756-3327

EXHIBIT SALES:

Alan Land
602 Seagate PMB #8219
Oceanside, CA 92054
(760) 212-5718/(888) 565-4350 fax
